FIRE E D U C T O R

by Schutte & Koerting

Mini Pumper as Supply Truck

DISTANCE: 100'
LIFT: 5'
LOCATION: NORTHERN, NJ
CHALLENGE: INCREASE CAPACITY OF A MINI-PUMPER

Drafting with a 300 gpm brush truck and supplying the TurboDraft with 200 gpm at 150 psig. This turned the brush truck into a water supply unit by sending the full 870 gpm of water out to the engine which is able to stay on the road.

*NOTE:

The pump on the brush truck used for this application must be able to supply 200 gpm at 150 psig.

TurboDraft™

FIRE EDUCATOR

by Schutte & Koerting

Engine receiving 870 gpm of water from the brush truck which is located at the water's edge.
